Decorative Strip cutting pads (#113479)

Sticky Strip (#104294)

**OTHER:**

Mod Podge

1 ¼ inch pin backs

Rectangle punch

Sponge brushes

# Paper Pin

## Step-by-Step photo instruction

You will need four pieces of the 2 1/2 x 2 inch Vanilla cardstock. Stamp the bells on one and adhere the other three with it using ModPodge

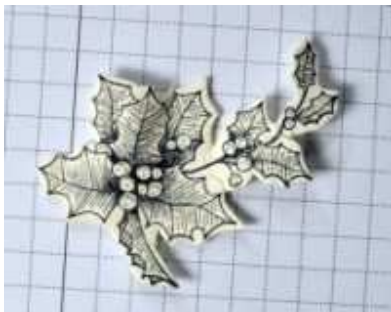

While it is still wet, cut out the image leaving 1/8<sup>th</sup> inch around the outside

'Shape' the cut image as shown, bending the bells (one out, one in)

Stamp the holly & ivy stamp on one 3 x 3 inch vanilla and adhere together with 3 other pieces with ModPodge

Cut out the image and shape it before it dries

You will have 2 pieces and I usually let dry for 1 hour

Take the jumbo snowflake from the snowflake strip

Punch out each hole with a toothpick

Make the pin holder by adhere the DSP to the artichoke cardstock rectangle

Lay the Artichoke 'template' over it and trace it

You will end up with it being off center (nearer to the top and a bit to the left, that's okay!)

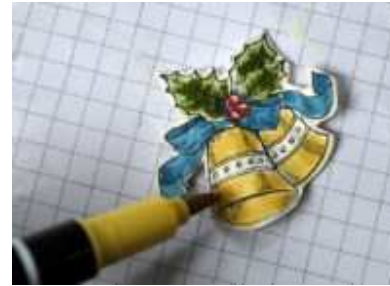

Punch each end

Cut out a thin line between the punched ends as shown

The finished product will look like this

Color in the bells using the markers

Color in the holly and berries as well

Adhere the two layers together with Dimensionals

Adhere the snowflake with a Dimensional

Remove the pink backing off the pre-glued pin

Adhere the pin to the back

Insert the pin on the BACK of the decorated rectangle so you won't mess the front

Use a VERY LIGHT coat of Crystal Effects to the entire front and the sides

LET THE Pin dry UNTOUCHED

- Set the pin around on the pretty side of the card
- Set the jewels after at least 1 hour
- BEST RESULTS – wait 24 hours and the use Crystal Effects to coat the back – pin MUST be dry
