

Pattern can be adapted to any side rectangle

Gift Bag/Pocketbook

By Amy Celona, www.ustamp4fun.com

- I cut a 12x12 to two 6x12 panels
- Each panel was **scored** along the 12" side at 5", 6" & 7" to create a two inch gusset (in my case it had to hold a dozen cookies)
- I cut the corners to appear to be almost a "pocketbook"
- I took my inspiration from a card that I made (see card below)
